

Preserving Life and Beauty through Nutrition

Color, Growth & Health Formula

A top performance diet for breeding freshwater fish

Ocean Nutrition's Color, Growth & Health Formula for freshwater fish is a top performance and easily digestible diet, formulated with high metabolizable energy contents and a special attention towards the nutritional needs of ornamental freshwater fish larvae.

This is achieved through careful selection and special treatment of the highest quality raw materials, as well as state-of-the-art processing and production techniques to preserve the diet's nutritional integrity.

As part of the specialized Ocean Nutrition range, this Color, Growth & Health Formula is the keystone diet for professional use, refined over the years and proven in the field.

- ✓ *High protein, slow sinking crumbles for breeding freshwater fish.*
- ✓ *Fast growth and low Feed Conversion Ratio.*
- ✓ *Contains a wide variety of carotenoid pigments.*
- ✓ *High HUFA and phospholipid content, optimum amino-acid balance with high DHA/EPA ratio.*
- ✓ *Inclusion of dietary health supplements to improve disease resistance and to reduce stress.*

USE

Use the Color, Growth & Health Formula for freshwater fish as co-feeding diet during the last Rotifer feeding phase and/or at start of Ocean Nutrition Artemia feeding.

Increase the quantities of Color, Growth & Health Formula during (enriched) Artemia feeding phase.

Continue the use during early weaning, weaning and post-weaning.

Feed according to larval age and fish density, in multiple rations.

INFO

The Color, Growth & Health Formula for freshwater fish is a highly palatable and easily digestible diet.

These high quality crumbles have been especially formulated to intensify the coloration, stimulate growth and improve the health of ornamental freshwater fish.

1. This diet is formulated with a strong attention towards red and orange colors (thanks to the inclusion of carotenoids like astaxanthin and canthaxanthin), yellow colors (xanthophylls) and blue colors (phycocyanin).

The inclusion of these pigments in a natural way ensures a balanced color enhancement, resulting in strong and vivid colors.

2. This premium formula has a high metabolizable energy content, mainly originating from refined protein sources.

The use of this formula results in an excellent growth performance, while still maintaining the ideal shape of the fish.

3. This Color, Growth & Health Formula contains a blend of necessary nutrients (like essential amino acids, vitamins, nucleotides, ...) and natural immunostimulants (β -glucans) that play a key role in the immune response and the health of fish.

Intensive testing have proven this formula results in a higher stress resistance and a better protection against disease outbreaks.

COMPOSITION

Protein	59,0 %
Fat	13,0 %
Fiber	0,7 %
Ash	9,3 %
Moisture	7,0 %
Total energy	4.550 Kcal/kg
Metabolizable energy	4.150 Kcal/kg
Vitamin A	22.500 IU/kg
Vitamin D3	3.000 IU/kg
Vitamin E	400 mg/kg
Vitamin C	1.000 mg/kg
Antioxidants	BHA, BHT, Ethoxyquin
$\Sigma\omega$ 3 HUFA	25 mg/g dwt
DHA/EPA	1,5

Fish and fish derivatives, vegetable protein extracts, molluscs and crustaceans, cereals, oils and fats, yeast, algae, vitamins (retinol (vit A), cholecalciferol (vit D3), tocopherol acetate (vit E), menadione (vit K3), thiamine mononitrate (vit B1), riboflavin (vit B2), pantothenic acid (vit B5), pyridoxine (vit B6), cobalamin (vit B12), l-ascorbic acid phosphate (vit C), niacin (vit B3), biotin (vit H), choline (vit B4), inositol (vit B8), folic acid (vit B11)), minerals, carotenoid pigments, preservatives and antioxidants.

STORAGE

Store in a dry place (max. 25 °C). For prolonged storage a temperature of 4°C is advised.

PACKAGING

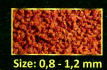

Diet type	Crumble Size	Packaging
Color, Growth & Health Formula Freshwater	0,1mm - 0,3mm	500gr can
Color, Growth & Health Formula Freshwater	0,3mm - 0,5mm	5kg bucket
Color, Growth & Health Formula Freshwater	0,5mm - 0,8mm	5kg bucket
Color, Growth & Health Formula Freshwater	0,8mm - 1,2mm	5kg bucket
Color, Growth & Health Formula Freshwater	1,2mm - 1,5mm	5kg bucket

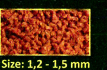

Size: 0,3 - 0,5 mm

Size: 0,5 - 0,8 mm

Size: 0,8 - 1,2 mm

Size: 1,2 - 1,5 mm
